

RULES AND REQUIREMENTS FOR PARTICIPATION ON TRAILS WEST FIELD TRIPS

It is the responsibility of each participant to observe the following rules and requirements.

The trip leader is the final authority on all trip activities. If you have any concerns about your physical condition, or the suitability of your vehicle, for participating on a trip, please contact the trip leader.

EQUIPMENT

TIRES--On most trips, expect to travel on rough, rocky roads in remote areas. Participants are responsible for assuring that they have a high clearance vehicle with adequate tires (preferably 6 ply rated) including a full sized spare tire.

VEHICLE--On some trips, a four-wheel-drive vehicle is required.

VEHICLE JACK--A fully functioning vehicle jack is required.

RADIO--A fully functioning CB radio is **REQUIRED** on all trips.

In addition to the items noted, it is strongly recommended that each vehicle carry extra water, a fire extinguisher, first aid kit, shovel, and a trash bag.

VEHICLE TRAVEL

When multiple vehicles are travelling together, some simple “rules of the road” will be used. These rules are:

1. Drive at a safe speed and maintain a safe distance between your vehicle and the one in front of you. Do not lag farther behind the vehicle in front of you than is necessary for safety.
2. Drive with your headlights on.

3. When turning off the road you are travelling on, be sure to wait until the vehicle behind you is close enough to see you making the turn.
4. Use your CB radio to keep other vehicles informed concerning road hazards and oncoming vehicle traffic.
5. If for any reason you decide to leave the group, you must advise the trip leader of your plans.

PETS

If you wish to bring a pet on the trip, you must get prior permission from the trip leader. Since some people are afraid of animals, even domestic pets, and for safety concerns, all pets must be kept on a leash at all times and kept out of work areas. You are also responsible for cleaning up after your pet at all camp areas.

LIABILITY WAIVER/RELEASE FORM

All participants must sign a Liability Waiver/Release form and turn it in to the Trip Leader in order to go on the trip.

DISPOSAL OF HUMAN WASTE

When possible, we select a site for the group camp that has an “outhouse.” When this is not possible, several other practices will need to be observed. These are:

1. Directing women to use one area and men to use another.
2. Dispose of human waste by using the “cat hole” method. This involves making a shallow hole, either by digging it or by pulling a large rock out of the ground, and then covering it when you are finished. It should be dug in the top 6-8 inches of organic soil and be at least 200 feet away from camps, trails and water sources. Toilet paper must be buried in the hole.

Cover and disguise the hole with natural materials when you are finished.

Folks may need to walk over 200 feet away from camp to insure that the “cat hole” locations are well scattered.
